

DNNSmart Website Analyser User Manual

Description

The module used to analyze your website data, user behavior. Such as when to visit a page, register, and how long they stay. You can see which page of your site is most popular and where users come from. You can also check the growth of database data volume and so on.

Install Module

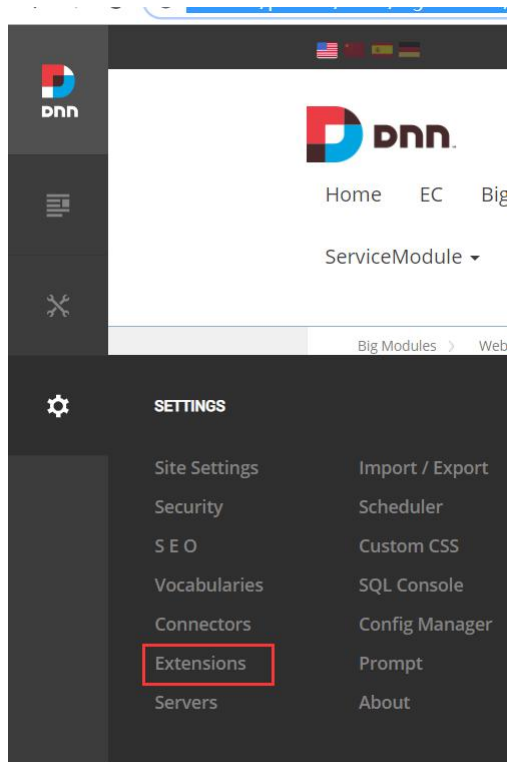

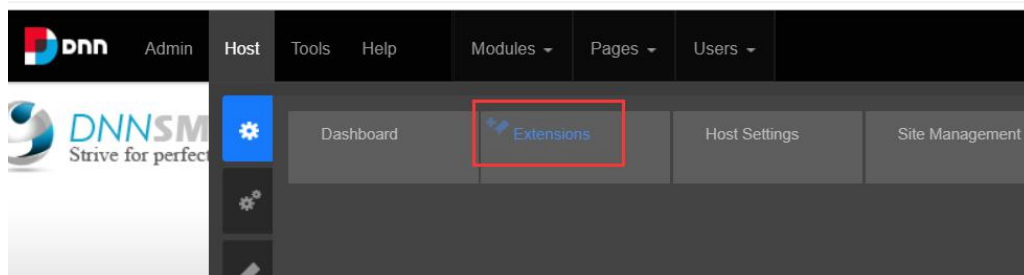

After you download this module, you will get below installation zip file.

WebsiteAnalyser_1.0.1_Install.zip

If your site is DNN7.x, you need to go here Host -> Extensions and click “Install Extension Wizard” button to install.

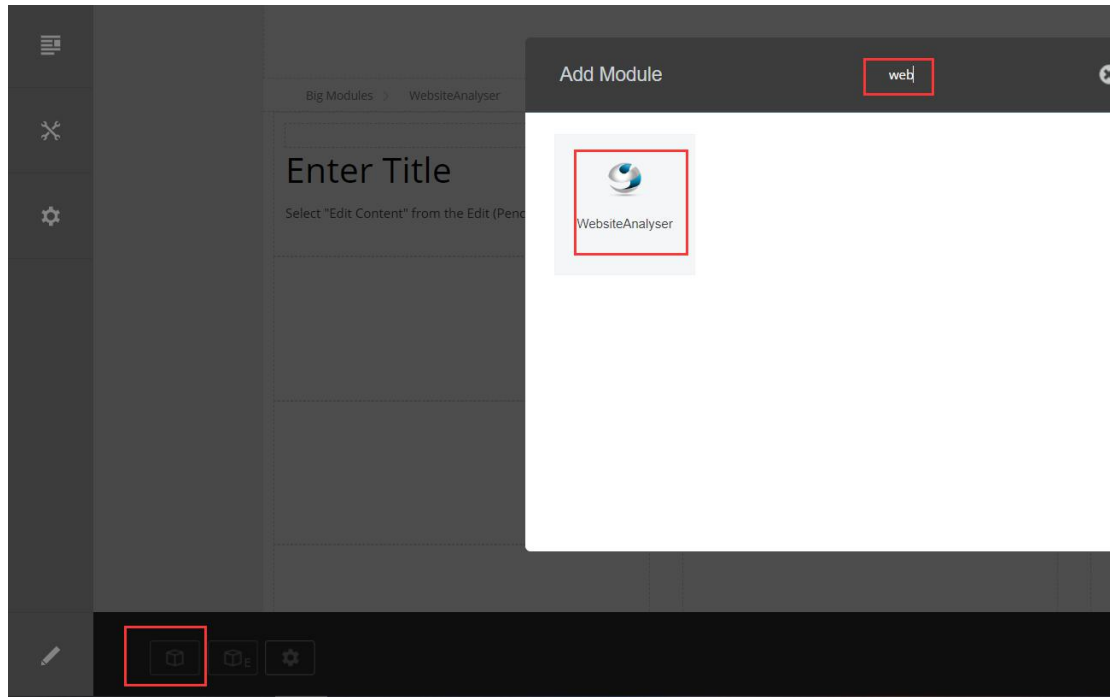

If your site is DNN9.x, you need to go here Settings-> Extensions and click “Install Extension” button to install.

You can see below screenshot.

How To Configure
