

DNNSmart Super Content User Manual

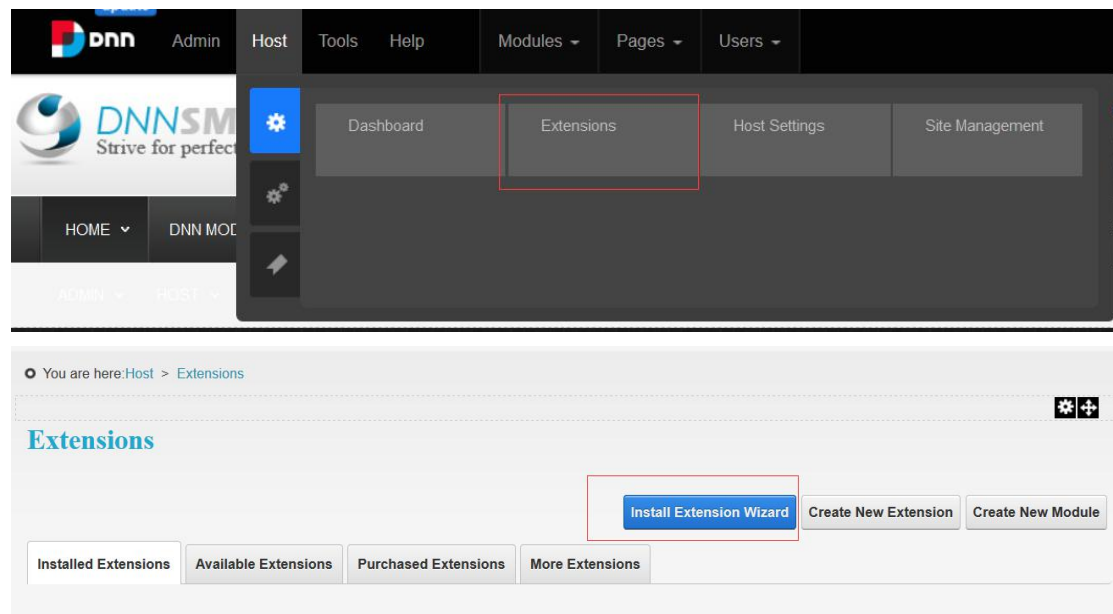

Description

This is a practical and cost-effective content management module. You can use it as one News, Article, Blog and so on. Later, we will add more practical functions. It can support features like custom template, multiple language and so on. This module provides one user friendly management interface, so you could learn how to use it quickly.

Install Module

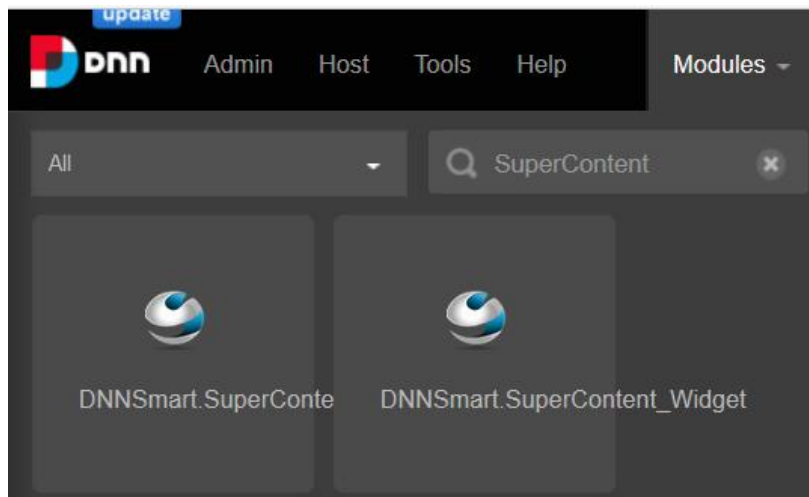

If your site is DNN5.x, DNN6.x, DNN7.x or DNN8.x, you need to go here Host -> Extensions and click “Install Extension Wizard” button to install.

You can see below screenshot.

How To Configure

1. After you install module package successfully, you will see DNNSmart.SuperContent module and DNNSmart.SuperContent_Widget module in module list. Please refer to screenshot below.

DNNSmart.SuperContent module is the main module, it's used to display and manage content. DNNSmart.SuperContent_Widget module includes many small widgets, it needs to use together with DNNSmart.SuperContent module. See screenshot below.

install dnn module (1) dnn (9)

dnnsmart module (3) super form (8)

2. After you learn about these two modules, you have two kinds of ways to add them on the page.

The first way is that you could add them on the page one by one. This way is a little troublesome.

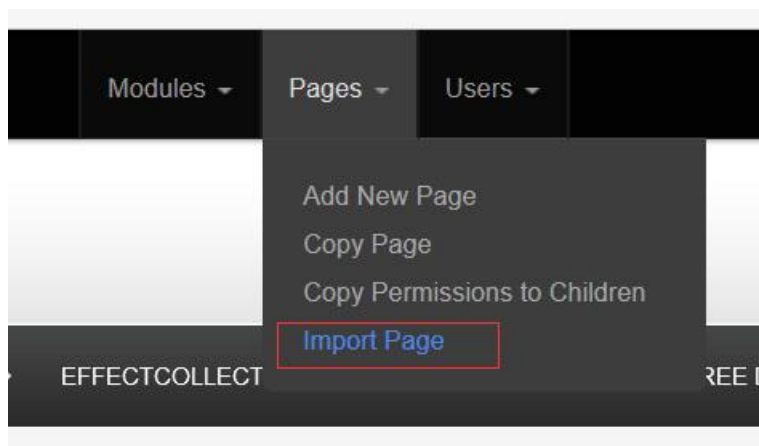

The second way is that you could add multiple modules on the page through importing our template. You can find SamplePage.page.template file in downloaded package. Then click Tools->Upload File button to upload file into Template directory. See screenshot below.

Upload Files

After that, you can click Pages->Import Page button to import page. See screenshot below.

Import Page

Folder: Templates

Template: SamplePage
Super Content Sample Page

Import Mode: ☒ Create a new Page ☐ Replace the current Page

Page Name: SamplePage

Parent Page: <None Specified>

Insert Page: ☐ Before ☒ After ☐ Add to End

Home

Redirect Mode? ☒ View imported Page ☐ Edit imported Page

[Import](#) [Cancel](#)

After you finish importing, you can see many modules being added on the page. Then you can edit and change according to your need.

See screenshot below. In this way, our configuration work is finished.

Export Data

In this area, you can import and export data. For example, if you want to import data from this one module to another one module, you can use this function.

The screenshot shows the 'Export Data' tab of the DNNSmart.SuperContent 01.00.00 interface. At the top, there is a 'Back' button and a 'Buy It' button. Below the tabs, a 'Note' states: 'You can export data to one xml file here if you want to copy data into another site. Then go to another site and import this xml file.' Under 'Transfer Type', there are two radio buttons: 'Export To Xml File' (selected) and 'Import From Xml File'. A red text instruction says 'Please click the "Export" button to export the xml file.' At the bottom, there is a blue 'Export' button.

Of course, DNN Import/Export Interface can also be used to import and export data. Moreover, it can import and export some settings of module Option Settings page.

Option Settings

In this area, you can see some basic settings of the module.

The screenshot shows the 'Option Settings' tab of the DNNSmart.SuperContent 01.00.00 interface. At the top, there is a 'Back' button. Below the tabs, the settings are as follows: 'Page Size' is set to 10; 'RSS Item Count' is set to 10 with a note '(0=unlimited)'; 'Display Comment Captcha' is checked; 'Display Author Biography' is checked; and 'Display Share Bar' is checked. At the bottom, there is a 'Save' button.

Permission Settings

After entering Permissions section of Module Settings page, you will see one "Write Permission". Through this Permission, you can control which person can be the Author to add content. Author can only see his/her own written articles, but admin can see all

articles written by all authors. See screenshot below.

Module

Module Settings **Permissions** **Page Settings**

Filter By Group: < Global Roles > Select Role: Diamond Member **Add**

Role	View Module	Edit Module	Write	Actions
Administrators				
All Users		<input type="checkbox"/>	<input type="checkbox"/>	
Registered Users		<input type="checkbox"/>	<input type="checkbox"/>	

When one user is the author, he/she will only see following page in the module back-end.
