

DNNSmart Bulk Email User Manual

Description

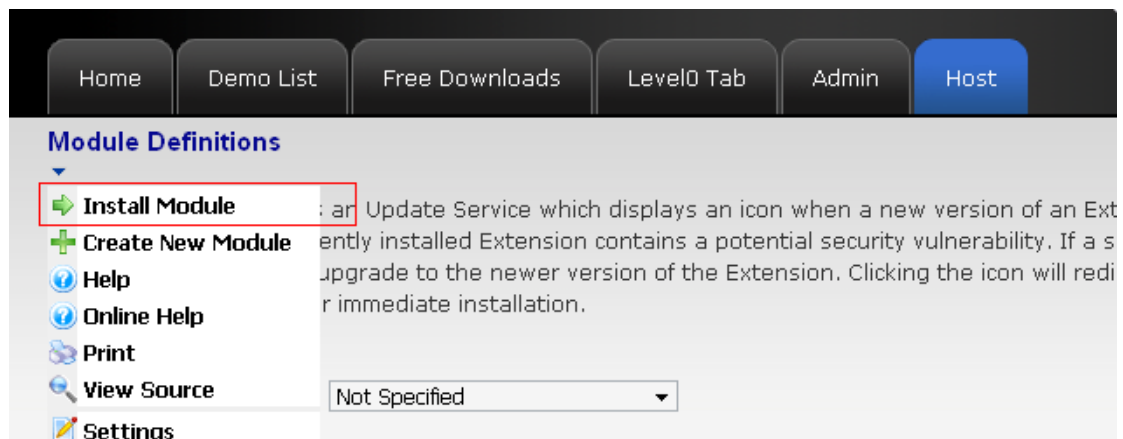

This is a simple module which can be used to send newsletters and e-mail marketing. Users can subscribe to newsletters. Admin can send bulk e-mail according to DNN role and configure this module to send e-mails. It supports customizing multiple e-mail templates. This module is so useful and flexible.

Features

- It can send e-mail according to DNN user role.
- It allows to import files with csv format. Those files can include Name, Email.
- Users without edit permission can enter one Name and Email to subscribe.
- It supports adding or deleting e-mail template.
- As there's large number of e-mails, the system will send these e-mails in batches. In this way, it can slow down the pressure of the server and reduce errors.

Install and Option Settings:

You can enter Host -> Module Definition page and click "Install Module" button. Please see the screenshot below:

After you install module successfully, you can add this module on your page.

View Page

当你以管理员权限登陆网站时，你可以看到如下界面，在这里你可以选择是发送给 Receiver List 中的所有用户，或者根据某个角色发送给拥有此角色的用户。你也可以选择一个模板，然后点击 "Load" 按钮读取模板，或者点击 "Delete" 按钮删除此模板。你填写好 Subject 和 Content 后点击 "Save And Save" 按钮，邮件就会发出并会保存这个模板。
