

DNNSmart Super Store User Manual

Description

This is one simple but useful e-commerce module. It consists of multiple submodules which can help you setup your DNN E-commerce sites quickly. It's very easy to configure module back-end, so non-technical users can fully control of it. It has simple UI, easy operation and most user friendly.

How To Install Module

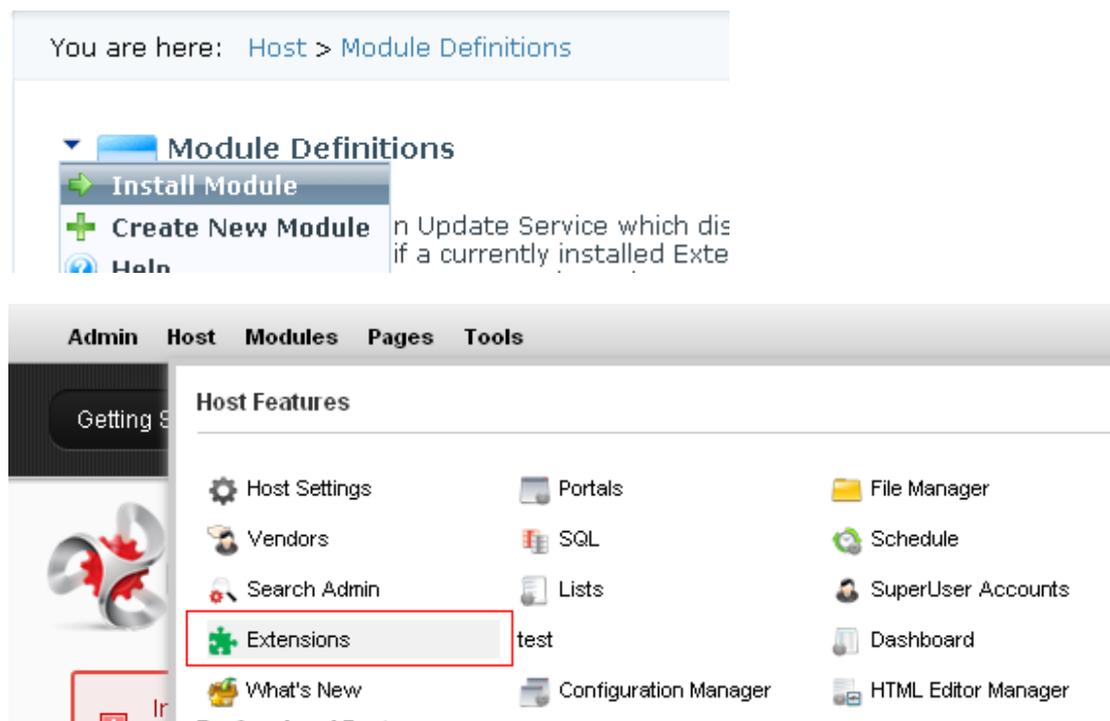

After you download this module, you will get following installation zip file.

DNNSmart.SuperStore_1.0.2_PA.zip

If your site is DNN4.x or DNN5.x, please go to this page Host -> Module Definition and click "Install Module" button to upload this module.

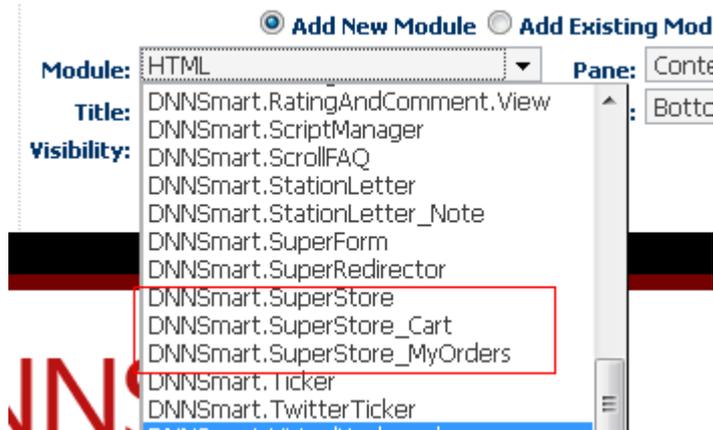

If your site is DNN6.x, you need to go here Host -> Extensions and click "Install Extension Wizard" button to install.

You can see screenshot below.

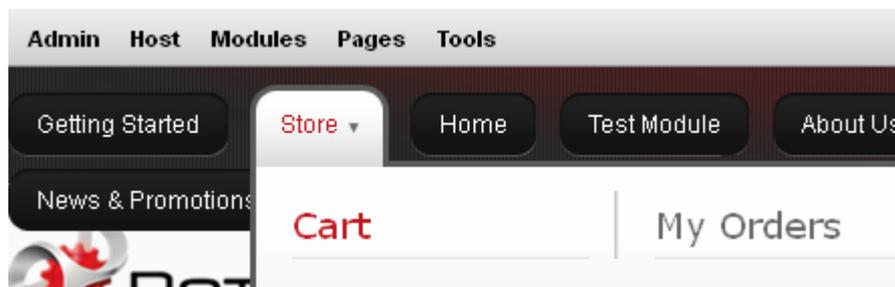

How To Configure Module

After you install module package, you will see three modules in module list. They are DNNSmart.SuperStore, DNNSmart.SuperStore_Cart, DNNSmart.SuperStore_MyOrders

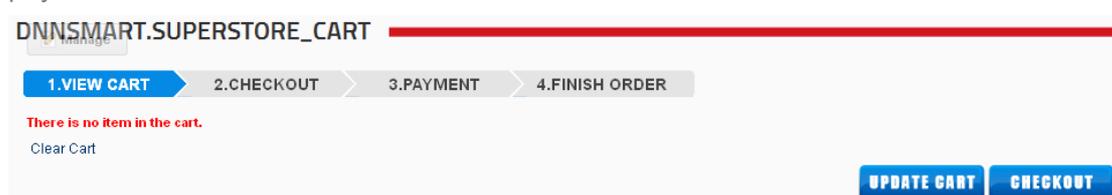

After that, you need to setup “Store”, “Cart” and “My Orders” these three pages to add these three modules. Please see screenshot below, you will see this after you finish this step.

First of all, please enter Store page and add “DNNSmart.SuperStore” module, this module can be divided into three submodules, they are DNNSmart.SuperStore, DNNSmart.SuperStore_Category, DNNSmart.SuperStore_MiniCart.

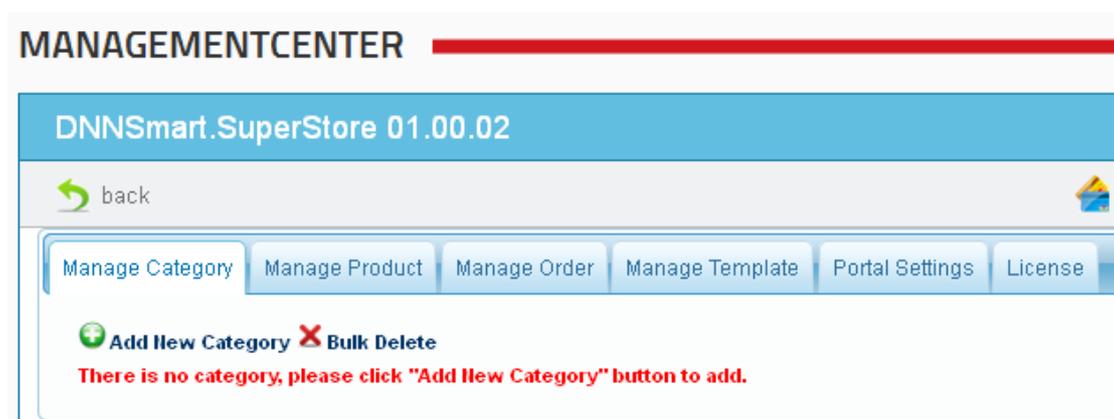

After that, please enter Cart page and add “DNNSmart.SuperStore_Cart” module. After clicking “View Cart” button, you will be redirected to this page automatically and make payment.

Next, please enter “MyOrders” page and add “DNNSmart.SuperStore_MyOrders” module. Users can view their own orders on this page.

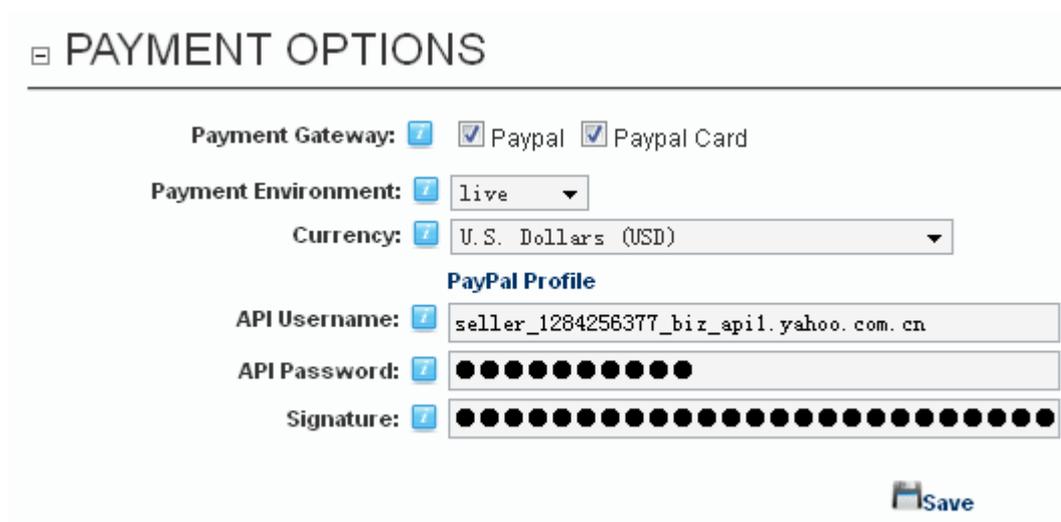

After adding modules and pages, please enter DNNSmart.SuperStore -> Management Center page and add products, categories accordingly. You also need to configure some Store features through entering Portal Settings page.

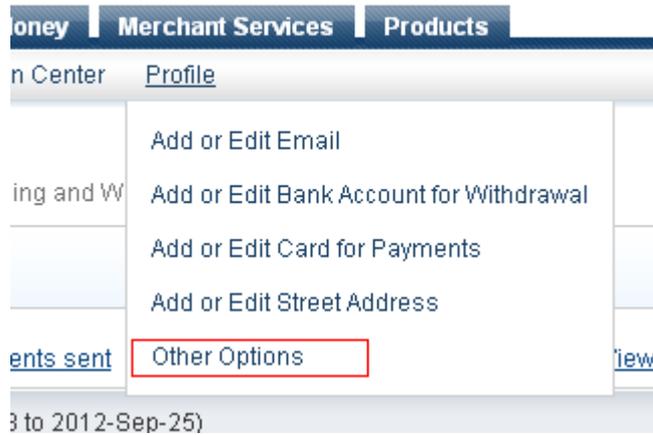

In this way, you finish configuring modules simply. We will introduce how to configure payment gateway and features on each page in the following.

How To Configure Paypal Payment Gateway

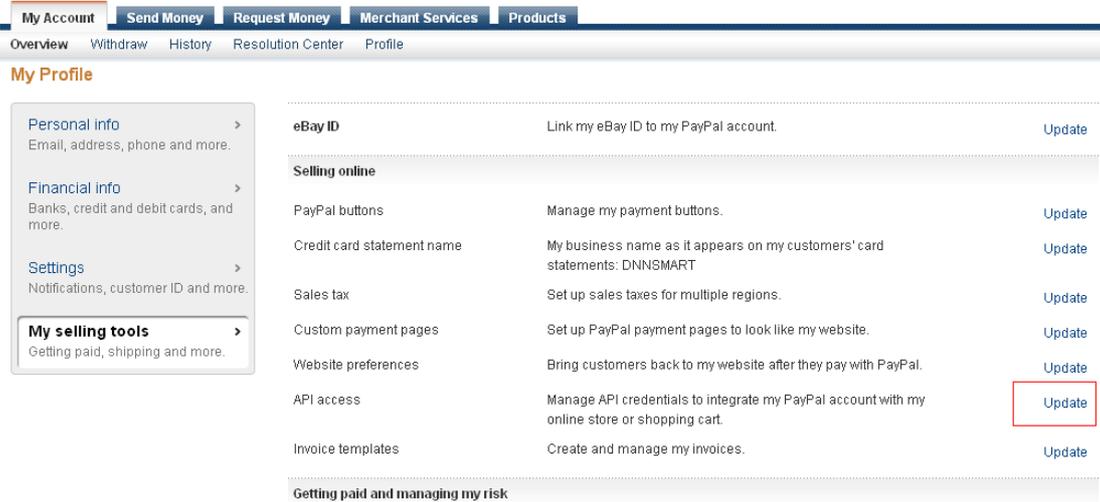

First of all, please enter Portal Settings page and you need to choose “live” mode for Payment Environment option. For Currency option, you can choose currency. Next, you can login your paypal account.

Please enter Profile -> Other Options page.

After that, please go to My selling tools -> API access and click Update button.

Please click "View API Signature" in Option2 as below.
